Hi Gina,

Three things :

1) Here are links to the Quality Review meeting page and report, respectively
<http://yosemite.epa.gov/sab/sabproduct.nsf/a84bfee16cc358ad85256ccd006b0b4b/e999ba302bda638a85257f16007c6b3f!OpenDocument&Date=2016-01-26>

2) We talked with Chris and would like to ask that the meeting be held after the SAB report is transmitted to the Administrator. However, preparation for NCEA's meeting can begin while the SAB report is being finalized. That is, NCEA can begin the NAS process around the time of the SAB Quality Review teleconference which is scheduled to take place January 26. It takes from 6-8 weeks to finalize and transmit the SAB report. This would give the public about 1 month+ to view the final report before NCEA's meeting.

If that doesn't work we can talk about other options. I think we are scheduled for a biweekly tomorrow and the 6th of January. If we don't have the right mix of folks tomorrow, we could talk further on the 6th.

3) Have a safe and happy holiday.

Again, thank you for letting us know about the plans for this meeting.

Best HoHoHo

Tom

Gina,

I anticipate at least a month after the teleconference to finalize the BaP report. I'd like to talk with folks here about the NAS February meeting and approaches implications. Let's circle back after we each chat with respective teams. I believe we are all back in the office Monday.

I am here through 23rd.

Happy Holidays & HoHoHo

Best

Tom

Thank you!

Can you remind me again what timeline would look like for having a final-ish report we could work with?

Our next IRIS public meeting is in February and we would have to let NAS know this week, if we were going to be able to talk about B[a]P there.

I get that you'll post the draft report and the committee will have a telecon. in late January.

But any idea how long it will take to edit and finalize? And then to go through the chartered SAB?

Just looking for estimates and next steps. I know how hard it is to predict exact timelines.

Thanks!!

And happy holidays!! ☺
